

Wall Decorations and Home Interior Design

A big part of home interior decorating is determining what to use on your walls. You can mount pictures, posters, paintings or mirrors to bring out the decorative balance in your room. Whatever you decide to put up on your walls should complement your home interior decorating style. Choose your pieces carefully and mount them thoughtfully. Each piece you hang up should be fully appreciated.

Determining Location

When determining the height at which to hang your decoration, choose a height where the pictures or paintings are at the eye level for easy viewing. If you hang pictures too high or too low the image is distorted and will not be appreciated. Take into consideration the pieces' relation to the furniture. A wall decoration can either make or break a piece of furniture. For example, a huge mirror should not be hung over a small credenza.

Enhancing your Pictures

The right frame can play an important role in bringing out your pictures. A picture frame can easily be modified by painting its molding. Keep your picture and mirror frames clean. Illuminate your pictures with picture lights, increasing the desired impact. You can also use spot lighting for the same effect. Take also into consideration the paint color of your walls when choosing your wall decorations. Choose a paint color or wall decorations that complement your home interior decorating style.

Using posters instead of Pictures

Posters are affordable options for a wall decoration project. Purchase posters that match your home interior decorating style. Once you have decided on your posters, you need to first smooth the poster. Use a cool iron; this allows the corners to stop curling up. The poster can then be attached directly to the wall by using wall paper adhesive. To finish off your poster wall decoration, consider painting over it with matte varnish. A poster can also be attached to a poster board or framed and mounted as your picture would.

Using Mirrors

Mirrors in home interior decorating add a feeling of larger space. Choosing the right mirrors is crucial. Mirrors are an inexpensive way to give a room a new look. Mirrors dramatically change the appearance of a room. A mirror brightens a room by reflecting the limited light and also gives the illusion of increased size of the room. Mirrors can be hung over an ugly spot on the wall or can even be used as a table top. Hanging a mirror requires the same hardware used to hang pictures. If hanging a large mirror, drill in the nails. Use nails or screws that can support the weight of the mirror. When tightening the screws, use a thin piece of cardboard to determine how tight the screw is.

If you are seeking a new look for a room, change the location of your wall decorations. This will give your room a new look without having to spend money on new pictures or paint for the walls.
